

Building stocks: a bibliography

Visit www.rbri.co.uk and www.BRIcommunity.net

NB: The titles below have hyperlinks

- Reconstitution of the dynamics of an urban building stock**
M Akszözen, U Hassler, N Kohler
- Mortality analysis of an urban building stock**
M Akszözen, U Hassler, M Rivallain, N Kohler
- Methodology for the sequence analysis of building stocks**
P E Bradley
- From the design of green buildings to resilience management of building stocks**
N Kohler
- Building retrofit in shrinking and ageing cities: a case based investigation**
T Weinsziehr, K Großmann, M Gröger, T Bruckner
- Vacant residential buildings as potential reserves: geographical and statistical study**
S Huuhka
- Materials in Germany's domestic building stock: calculations and uncertainties**
R Ortlepp, K Gruhler & G Schiller
- Material stocks in Germany's non-domestic buildings: a new quantification method**
R Ortlepp, K Gruhler & G Schiller
- Homogenous homes of Finland: 'standard' flats in non-standardized blocks**
T Kaasalainen & S Huuhka
- Overheating in English dwellings: comparing modelled and monitored large-scale datasets**
P Symonds, J Taylor, A Mavrogianni, M Davies, C Shrubsole, I Hamilton & Z Chalabi
- Owner organizations' value-creation strategies through environmental certification of buildings**
N Brown, T Malmqvist & H Wintzell
- From sustainability to adaptation: Goldman Sachs' corporate real estate strategy**
J M Keenan
- Statistical and geographical study on demolished buildings**
S Huuhka & J Lahdensivu
- Using decomposition analysis to forecast metal usage in the building stock**
H Hatayama & K Tahara
- Decarbonizing national housing stocks: strategies, barriers and measurement**
KJ Lomas
- Using decomposition analysis to forecast metal usage in the building stock**
H Hatayama & K Tahara
- A method for determining buildings' material composition prior to demolition**
F Kleeman, J Lederer, P Aschenbrenner, H Rechtberger & J Fellner
- Towards modelling of construction, renovation and demolition activities: Norway's dwelling stock, 1900–2100**
I Sartori, H Bergsdal, DB Müller & H Brattebø
- Dynamic material flow analysis for PCBs in the Norwegian building stock**
H Bergsdal, H Brattebø & D B Müller
- Long-term management of building stocks**
N Kohler & W Yang [Free to view](#)*
- The building stock as a research object**
N Kohler & U Hassler [Free to view](#)*
- Long-term building stock survival and intergenerational management: the role of institutional regimes**
U Hassler [Free to view](#)*
- Methodology for the survival analysis of urban building stocks**
PE Bradley and N Kohler
- Research on the building stock and its application**
N Kohler, P Steadman, U Hassler [Free to view](#)*
- Dynamic material flow analysis for Norway's dwelling stock** *H Bergsdal, H Brattebø, RA Bohne and DB Müller*
- Enabling urban-scale energy modelling: a new spatial approach**
S Taylor, D Fan & M Rylatt
- Influence of district features on energy consumption in non-domestic buildings**
R Choudhary & W Tian
- Understanding the New Zealand non-domestic building stock** *N Isaacs & A Hills*
- Comparing European residential building stocks: performance, renovation and policy opportunities**
F Meijer, L Itard and M Sunikka-Blank
- Comparing environmental impacts of renovated housing stock with new construction**
L Itard & G Klunder
- Replacement or renovation of dwellings: the relevance of a more sustainable approach**
A Thomsen & K van der Flier
- Assessing impacts of summertime overheating: some adaptation strategies**
A-A Tillson, T Oreszcyn & J Palmer [Free to view](#)*
- Space heating demand and heat wave vulnerability: London domestic stock**
A Mavrogianni, M Davies, Z Chalabi, P Wilkinson, M Kolokotroni & J Milner
- Dynamic-MFA examination of Chilean housing stock: long-term changes and earthquake damage**
C Gallardo, N H Sandberg & H Brattebø
- Alternative scenarios for energy conservation in the building stock**
N Kohler & U Hassler
- Net-zero buildings: incorporating embodied impacts** *T Lützkendorf, G Foliente, M Balouktsi & A H Wiberg*
- Energy and urban built form: an empirical and statistical approach**
P Steadman, I Hamilton & S Evans [Free to view](#)*
- Ecological modernization of sustainable buildings: a Danish perspective**
J O Jensen & K Gram-Hanssen
- Towards a very low energy building stock: modeling the US commercial building sector to support policy and innovation planning**
B Coffey, S Borgeson, S Selkowitz, J Apte, P Mathew & P Haves
- Analysis of energy and carbon flows in the future Norwegian dwelling stock**
NH Sandberg & H Brattebø
- Housing stock shrinkage: vacancy and demolition trends in Germany**
C Deilmann, K-H Effenberger & J Banse
- Dynamics of urban and rural housing stocks in China**
M Hu, H Bergsdal, E van der Voet, G Huppes & DB Müller [Free to view](#)*
- Quantifying the extent of space shortages: English dwellings** *M Morgan & H Cruickshank [Free to view*](#)*

Key factors determining the energy rating of existing English homes
A Stone, D Shipworth, P Biddulph & T Oreszczyn **Free to view***

Room-scale profiles of space use & electricity consumption in non-domestic buildings
R Liddiard **Free to view***

Motivating stakeholders to deliver change: Tokyo's Cap-and-Trade Program
Y Nishida & Y Hua

Uptake of energy efficiency interventions in English dwellings
IG Hamilton, D Shipworth, A J Summerfield, P Steadman, T Oreszczyn & R Lowe **Free to view***

Wall area, volume and plan depth in the building stock
P Steadman, S Evans & M Batty **Free to view***

Energy in New Zealand houses; comfort, physics and consumption
N Isaacs, K Saville-Smith, M Camilleri, L Burrough

Alternative scenarios for energy conservation in the building stock
N Kohler & U Hassler

Net-zero buildings: incorporating embodied impacts
T Lützkendorf, G Foliente, M Balouktsi & A H Wiberg

Energy use in non-domestic buildings: the UK government's new evidence base
C Nicolls

Patterns of residential heat demand in rural Switzerland
M Schlegel, E Trutnevyte & R W Scholz

An approach to impact assessments of buildings in a changing climate
A-J Almás, KR Lisø, HO Hygen, CF Øyen & JV Thue

Improved benchmarking comparability for energy consumption in schools
S-M Hong, G Paterson, D Mumovic & P Steadman **Free to view***

Impacts of sea level rise towards 2100 on buildings in Norway
A-J Almás & HO Hygen

The ecological crisis and self-delusion: implications for the building sector
WE Rees **Free to view***

Urban social housing resilience to excess summer heat
A Mavrogianni, J Taylor, M Davies, C Thoua, J Kolm-Murray

Consequences of massive housing destruction: the NYC fire epidemic
D Wallace & R Wallace

A data framework for measuring the energy consumption of the non-domestic building stock
H Bruhns & P Wyatt

Assessing cities: a new system of cross-scale spatial indicators
L Bourdic, S Salat & C Nowacki

Energy loads, CO2 emissions and building stocks: mor-phologies, typologies, energy systems and behaviour
S Salat

Resilience to increasing temperatures: residential building stock adaptation through codes and standards
M Gangoellels & M Casals

Challenges and future directions for energy and buildings research
AJ Summerfield & R Lowe **Free to view***

Energy efficiency and low-carbon technologies in urban renewal
M Sunikka

Exploring energy integration between new and existing developments
IG Hamilton, AJ Summerfield, JP Steadman, A Stone & M Davies

Towards a neighbourhood scale for low- or zero-carbon building projects
A Koch, S Girard & K McKoen

Household energy consumption: a study of the role of occupants
K Steemers and GY Yun

Resilient housing: a new resource-oriented approach
LA Nicol & P Knoepfel

Simulation of the evolution of the Chinese building and infrastructure stock
W Yang and N Kohler

Carbon reduction in existing buildings: a transdisciplinary approach
KJ Lomas **Free to view***

The role of institutional regimes in motivating change for sustainable housing
LA Nicol

Housing and energy in Denmark: past, present, and future challenges
R Marsh, VG Larsen & M Kragh

Modelling building stock geometry for energy, emission and mass calculations
Z Szalay

Analyzing building stock using topographic maps and GIS
G Meinel, R Hecht & H Herold

Urban stock over time: spatial material stock analysis using 4d-GIS
H Tanikawa & S Hashimoto

Successful greenhouse gas mitigation in existing Australian office buildings
J Gabe

Perspectives in the reality-based generation, nD modeling and operation of buildings and building stocks
A Grün, M Behnisch & N Kohler

Urban data mining: spatio-temporal exploration of multidimensional data
M Behnisch and A Ultsch

Risk and regulation: can improved government action reduce the impacts of natural disasters?
R Spence

Residential building damage and natural perils: Australian examples and issues
R Blong

Mitigating CO2 emissions from energy use in the world's buildings
D Ürge-Vorsatz, L Harvey, S Mirasgedis & M Levine

Examining the carbon agenda via the 40% House scenario
B Boardman **Free to view***

Defining and meeting the carbon constraints of the 21st century
R Lowe

Appraisal of policy instruments for reducing buildings' CO2 emissions
D Ürge-Vorsatz, S Koepfel & S Mirasgedis

Technical options and strategies for decarbonizing UK housing
R Lowe **Free to view***

Policy and strategy challenges for climate change and building stocks
R Lowe

Impacts of climate change on building performance in New Zealand
M Camilleri, R Jaques and N Isaacs

Evaluating unauthorized appendages in private apartment buildings
DCW Ho, KW Chau and Y Yau

Lessons from the 2003 heat wave: a French perspective
J-L Salignac

Health issues and the building stock
E Hasselaar

Perceived health and comfort in relation to energy use and building characteristics
C-A Roulet, N Johner, F Foradini, P Bluysen, C Cox, E De Oliveira Fernandes, B Müller & C Aizlewood

Conceptualizing the built environment as a social-ecological system
S Moffatt and N Kohler **Free to view***

Exploring built environment stock metabolism and sustainability by systems analysis approaches
H Brattebø, H Bergsdal, NH Sandberg, J Hammervold & DB Müller

Using Display Energy Certificates to quantify schools' energy consumption
D Godoy-Shimizu, P Armitage, K Steemers & T Chenvidyakarn

Understanding obsolescence: a conceptual model for buildings
A Thomsen & K van der Flier

Historical energy analysis of the Norwegian dwelling stock NH
Sandberg, H Bergsdal & H Brattebø

Urban infrastructure: challenges for resource efficiency in the building stock
G Schiller

Longitudinal analysis of energy metering data from non-domestic buildings

N Brown, AJ Wright, A Shukla & G Stuart

The post-war destruction of Swedish cities

BOH Johansson

Strategic technical management of housing stock: lessons from Dutch housing associations

A Straub

Demolition and preservation in shrinking US industrial cities *A Mallach*

Policy challenges for building stocks

M Barrett

National building stocks: addressing energy consumption or decarbonization?

H Herring
